isabel-villalta.dev

CORE COMPETENCIES

- ▶ Clinical trial coordination (Ph I–III)
- ▶ eCRF data entry & query resolution
- ▶ AE / SAE documentation & follow-up
- ▶ ISF / TMF management
- ▶ Regulatory document tracking
- ▶ Protocol-scheduled patient visits
- ▶ IMP accountability & dispensing logs
- ▶ Monitoring visit support (SDV/SDR)
- ▶ Ethics Committee submissions
- ▶ Dangerous Goods handling (UN3373 Cat. B)
- ▶ ALCOA+ data integrity principles
- ▶ Protocol compliance & SOPs (ICH-GCP)

TOOLS & SOFTWARE

- ▶ eCRF platforms (hands-on)

PROFESSIONAL PROFILE

Biotechnology graduate and MSc candidate in Clinical Trial Monitoring with active hands-on experience coordinating Phase I–III trials in Haematology and Rare Diseases at Quirónsalud Zaragoza. Fully certified in ICH-GCP E6(R3) and Dangerous Goods (UN3373 Cat. B). Proven ability to maintain inspection-ready ISF documentation, resolve CRA/sponsor queries, and coordinate multi-visit patient schedules across concurrent studies. Also developed an independent portfolio of clinical research tools, including an interactive clinical trial simulator and an eCRF with automated query management, publicly accessible at isabel-villalta.dev.

PROFESSIONAL EXPERIENCE

Clinical Research & Study Coordination Trainee

Quirónsalud – Haematology & Rare Diseases

Jun 2026 – Dec 2026 · Zaragoza, Spain

Therapeutic areas: Myelofibrosis, Chronic Myeloid Leukaemia, Chronic Lymphocytic Leukaemia, Polycythaemia Vera, Mastocytosis, Fabry Disease and Gaucher Disease.

- ▶ **Coordinated protocol-scheduled patient visits across concurrent Phase I–III clinical trials:** scheduling and tracking required assessments, laboratory tests, imaging procedures and sample shipments within protocol-defined visit windows, minimizing the risk of protocol deviations.
- ▶ **Managed daily clinical trial activities through Casiopea (eMR):** creating and monitoring protocol visits, requesting laboratory tests, reviewing haematological and biochemical results, and transferring relevant clinical information into study EDCs.
- ▶ **Entered and maintained clinical trial data in EDC systems:** including Medidata Rave, Veeva Vault, Viedoc and REDCap, covering vital signs, haematology and biochemistry results, concomitant medications, adverse events and additional procedures, following ALCOA+ data integrity principles.
- ▶ **Identified and resolved discrepancies between source documentation and EDC data:** detecting missing, incomplete or inconsistent information and coordinating query resolution with investigators, CRAs and sponsors.

- ▶ ISF management systems
- ▶ Excel: Pivot Tables, VLOOKUP, dynamic filtering for clinical data traceability
- ▶ AI tools – protocol deviation & risk detection
- ▶ Monday.com · R Commander · GraphPad
- ▶ HTML / CSS / JavaScript (portfolio site)

LANGUAGES

- 🌐 **Spanish** — Native
- 🌐 **English** — B2 Cambridge (C1 in progress, Sep 2026)

VOLUNTEERING

CiberAula **Paediatric Programme**

Fundación Canfranc · Hospital Clínico Lozano Blesa

Sep 2025 – May 2026 · 9 months

Weekly support to hospitalised children through educational and creative activities — reinforcing empathy, adaptability, and communication in a live clinical setting.

▶ **Supported AE/SAE documentation and follow-up** in accordance with ICH-GCP requirements, ensuring timely communication and appropriate follow-up of safety information across Haematology and Rare Disease studies.

▶ **Supported monitoring visits and SDV/SDR activities alongside CRAs and sponsors**, providing access to source documentation, reviewing accountability, delegation and training records, and addressing data discrepancies during monitoring activities.

▶ **Maintained essential study documentation within the ISF**, including delegation logs, accountability records, patient documentation and other study-specific files, ensuring traceability, completeness and inspection readiness.

▶ **Managed investigational medicinal product (IMP) dispensing processes through IXRS/IWRS systems**, collaborating with the Pharmacy Department and verifying that protocol-defined dispensing criteria were met before treatment assignment and dispensing.

▶ **Uploaded and managed clinical imaging through Clario and Inerisys**, including ECGs and MRI scans, ensuring correct file transfer, identification and nomenclature according to study requirements.

▶ **Coordinated biological sample packaging and shipment to central laboratories** as a certified Dangerous Goods handler (UN3373 Category B), ensuring compliance with applicable shipping and study requirements.

▶ **Managed patient-related expenses associated with clinical trial visits**, processing and following up transportation, accommodation and meal tickets through platforms such as Scout and Bonotaxi, coordinating coverage and reimbursement according to sponsor requirements.

Laboratory Trainee – Lysosomal Storage Diseases

FEETEG – Rare Disease Diagnostic Laboratory ·

Jul 2026 · Zaragoza, Spain

- ▶ **Gained specialised exposure to diagnostic workflows** for Gaucher, Fabry, Niemann-Pick, LAL-D, and ASMD, including biomarker interpretation (Lyso-Gb1/3, chitotriosidase, CCL18) in the context of ERT, SRT, and gene therapy response evaluation.
- ▶ Worked under strict analytical quality criteria in a rare disease diagnostic environment.

Genetics Laboratory Intern

Hospital Universitario Miguel Servet ·

Jul – Aug 2024 · Zaragoza, Spain

- ▶ **Contributed to patient diagnosis** by analysing karyotypes, array CGH, clinical exome, and NGS across coeliac disease, Fragile X syndrome, thrombophilias, DPYD/UGT pharmacogenetics, and Y-chromosome deletions.
- ▶ Direct patient interaction in outpatient consultations; clinical documentation and sample management.

Bachelor's Thesis – ALS Biomarker Research

University of Zaragoza ·

Oct 2024 – Sep 2025 · Zaragoza, Spain

- **Identified molecular biomarkers of ALS progression** in an hSOD1-G93A mouse model using RNA extraction, RT-qPCR optimisation, and ANOVA-based differential gene expression analysis — building deep data traceability discipline from the ground up.

EDUCATION

MSc in Clinical Trial Monitoring

Universidad Internacional de La Rioja (UNIR) ·

Nov 2025 – Nov 2026

Final project: full clinical trial protocol design for a psoriasis study — from feasibility to site close-out.

BSc in Biotechnology · GPA 8.3 / 10

University of Zaragoza · Sep 2021 – Jun 2025

CERTIFICATIONS & TRAINING

- **ICH Good Clinical Practice E6(R3)** – The Global Health Network (Apr 2026 – Apr 2028)
- **Dangerous Goods – UN3373 Category B** – Mayo Clinics (Jul 2026)
- **Good Laboratory Practice (GLP)** – The Global Health Network (Apr 2026 – Apr 2028)
- **AI Applied to Project Management** – University of Zaragoza (Mar – Apr 2026)
- **Excel Advanced: Pivot Tables & Clinical Data Traceability** – LinkedIn Learning (Jun – Jul 2026)
- **Project Management** – INAEM – University of Zaragoza (Jul 2025)
- **Cambridge B2 English Certificate** – Cambridge Assessment English (2019 · C1 in progress)
- **Category B Driving Licence** – Dirección General de Tráfico (2024)

PORTFOLIO PROJECTS

Independent projects developed to demonstrate applied Study Coordinator competencies and clinical data skills. Fully interactive and publicly accessible at isabel-villalta.dev.

 Clinical Trial Dashboard Excel · Interactive Portfolio Project

A fully functional Excel workbook simulating the operational monitoring of a clinical trial, designed to demonstrate the kind of tracking and traceability work a Study Coordinator performs daily.

- Pivot Tables and dynamic filtering for real-time patient enrollment tracking across sites
- Automated conditional formatting flags for protocol deviation alerts and overdue visits
- Excel-based KPI dashboard: screen failure rates, dropout rates, visit compliance by site
- Data traceability throughout — every entry timestamped and traceable to source

 eCRF Simulator with Automatic Query Management Excel · Interactive Portfolio Project

An Excel-based simulation of an Electronic Case Report Form covering a complete haematology study visit — from demographics and eligibility to adverse events and drug accountability — with an integrated automatic query engine.

- ▶ Auto-generated data queries triggered by out-of-range values, missing fields, and protocol inconsistencies
- ▶ Query Management sheet with status tracking (Open / Pending / Resolved) and audit trail simulation
- ▶ Structured across 12 sheets: Home, Demographics, Eligibility, Vital Signs, Labs, AEs, Drug Accountability, Queries, Dashboard, Audit Trail
- ▶ Designed to mirror real eCRF platforms (Medidata Rave / Oracle InForm) at a junior coordinator level

Personal Portfolio Website *HTML / CSS / JavaScript · Live*

Self-built professional portfolio website showcasing clinical research experience, projects, and scientific communication — designed for CRO and pharma recruiters.

- ▶ Live interactive Phase III clinical trial simulator — adjust sites, patient targets, screen failure and dropout rates in real time
- ▶ Live eCRF validator with automatic data checks and query generation
- ▶ Sections: Clinical Experience, Projects, Scientific Writing, Learning Journey, Clinical Research Toolkit
