CORE COMPETENCIES

- ▶ Clinical trial coordination (Ph I–III)
- ▶ eCRF data entry & query resolution
- ▶ AE / SAE documentation & follow-up
- ▶ ISF / TMF management
- ▶ Regulatory document tracking
- ▶ Protocol-scheduled patient visits
- ▶ IMP accountability & dispensing logs
- ▶ Monitoring visit support (SDV/SDR)
- ▶ Ethics Committee submissions
- ▶ Dangerous Goods handling (UN3373 Cat. B)
- ▶ ALCOA+ data integrity principles
- ▶ Protocol compliance & SOPs (ICH-GCP)

TOOLS & SOFTWARE

- ▶ eCRF platforms (hands-on)
- ▶ ISF management systems
- ▶ Excel: Pivot Tables, VLOOKUP, dynamic filtering for clinical data traceability
- ▶ AI tools – protocol deviation & risk detection
- ▶ Monday.com · R Commander · GraphPad

PROFESSIONAL PROFILE

Biotechnology graduate and MSc in Clinical Trial Monitoring with active hands-on experience coordinating Phase I–III trials in Haematology and Rare Diseases at Quirónsalud Zaragoza. Fully certified in ICH-GCP E6(R3) and Dangerous Goods (UN3373 Cat. B). Proven ability to maintain inspection-ready ISF documentation, resolve CRA/sponsor queries, and coordinate multi-visit patient schedules across concurrent studies, always with a patient-first approach. Seeking a Study Coordinator role in a CRO where scientific rigour and operational excellence translate directly into patient benefit.

PROFESSIONAL EXPERIENCE

Clinical Research & Study Coordination Trainee

Quirónsalud – Haematology & Rare Diseases · Jun 2026 – Dec 2026 · Zaragoza, Spain

- ▶ **Ensured zero protocol deviations in patient visit scheduling** by coordinating assessments, lab draws, imaging, and sample shipments within tight protocol windows across multiple concurrent Phase I–III studies.
- ▶ **Maintained inspection-ready ISF documentation** including delegation logs, accountability logs, patient records, and regulatory files — audit-ready at all times.
- ▶ **Resolved CRA and sponsor data queries with accuracy and speed**, entering and maintaining clinical data in eCRFs in full compliance with ALCOA+ integrity principles.
- ▶ **Supported AE/SAE identification, documentation, and follow-up** per ICH-GCP guidelines, contributing to uninterrupted patient safety surveillance across myelofibrosis, Fabry disease, Gaucher disease, mastocytosis, chronic leukaemias, and polycythemia vera.
- ▶ **Facilitated monitoring visits alongside CRAs and sponsors**, contributing to SDV activities and responding to real-time data queries to keep study timelines on track.
- ▶ **Managed IMP accountability and dispensing logs**, including drug inventory reconciliation and treatment tracking for investigational medicinal products.
- ▶ **Packaged and dispatched biological samples to centralised laboratories** as a certified Dangerous Goods handler (UN3373 Category B), ensuring regulatory compliance in every shipment.

Laboratory Trainee – Lysosomal Storage Diseases

FEETEG – Rare Disease Diagnostic Laboratory · Jul 2026 · Zaragoza, Spain

- ▶ **Gained specialised exposure to diagnostic workflows** for Gaucher, Fabry, Niemann-Pick, LAL-D, and ASMD — including biomarker interpretation (Lyso-Gb1/3, chitotriosidase, CCL18) in the context of ERT, SRT, and gene therapy response evaluation.
- ▶ Worked under strict analytical quality criteria in a rare disease diagnostic environment, reinforcing attention to protocol detail and sample traceability.

LANGUAGES

-  **Spanish** — Native
-  **English** — B2 Cambridge (C1 in progress, Sep 2026)

VOLUNTEERING

CiberAula Paediatric Programme

Fundación Canfranc · Hospital Clínico Lozano Blesa

Sep 2025 – May 2026 · 9 months
Weekly support to hospitalised children through educational and creative activities — reinforcing empathy, adaptability, and communication in a live clinical setting.

Genetics Laboratory Intern

Hospital Universitario Miguel Servet · Jul – Aug 2024 · Zaragoza, Spain

- ▶ **Contributed to patient diagnosis** by analysing karyotypes, array CGH, clinical exome, and NGS across coeliac disease, Fragile X syndrome, thrombophilias, DPYD/UGT pharmacogenetics, and Y-chromosome deletions.
- ▶ Gained direct patient interaction experience in outpatient consultations and managed clinical documentation and sample processing workflows.

Bachelor's Thesis – ALS Biomarker Research

University of Zaragoza · Oct 2024 – Sep 2025 · Zaragoza, Spain

- ▶ **Identified molecular biomarkers of ALS disease progression** in an hSOD1-G93A mouse model using RNA extraction, RT-qPCR optimisation, and ANOVA-based differential gene expression analysis — building deep data traceability discipline from the ground up.

EDUCATION

MSc in Clinical Trial Monitoring

Universidad Internacional de La Rioja (UNIR) · Nov 2025 – Nov 2026

Final project: full clinical trial protocol design for a psoriasis study — from feasibility to site close-out.

BSc in Biotechnology · GPA 8.3 / 10

University of Zaragoza · Sep 2021 – Jun 2025

CERTIFICATIONS & TRAINING

- ▶ **ICH Good Clinical Practice E6(R3)** – The Global Health Network (Apr 2026 – Apr 2028)
- ▶ **Dangerous Goods – UN3373 Category B** – Mayo Clinics (Jul 2026)
- ▶ **Good Laboratory Practice (GLP)** – The Global Health Network (Apr 2026 – Apr 2028)
- ▶ **AI Applied to Project Management** – University of Zaragoza (Mar – Apr 2026)
- ▶ **Excel Advanced: Pivot Tables & Clinical Data Traceability** – LinkedIn Learning (Jun – Jul 2026)
- ▶ **Project Management** – INAEM – University of Zaragoza (Jul 2025)
- ▶ **Cambridge B2 English Certificate** – Cambridge Assessment English (2019 · C1 in progress)
- ▶ **Category B Driving Licence** – Dirección General de Tráfico (2024)
